

Name :- Shubham Pawar

Course Name :- Java Full Stack Development

Ref. No. SCS/CG/2021/025

Program name :- IOStream

1. IOStream.java file Code :-

```
import java.io.*;
```

```
import java.util.*;
```

```
import java.io.IOException;
```

```
public class IoStream {
```

```
    public static void main(String[] args) throws IOException {
```

```
        String str = "Shubham Sudhakar Pawar";
```

```
        try {
```

```
            File file = new File("E:/Symbi/IoStreamtxt file/lostream.txt");
```

```
            FileWriter fw = new FileWriter(file,true);
```

```
            for(int i=0;i<str.length();i++)
```

```
                fw.write(str.charAt(i));
```

```
//                fw.append( "\n \r Mobile no : " );
```

```
            System.out.println("Succesfully Written");
```

```
            fw.close();
```

```
        }
```

```
        catch(Exception e) {  
            e.printStackTrace();  
        }  
    } }  
}
```

//next code in filereader.java file continued

2.Filereader.java file code :-

```
import java.io.*;  
  
public class Filereader {  
    public static void main(String[] args) throws Exception {  
        FileReader fl = new FileReader("E:/Symbi/loStreamtxt file/lostream.txt");  
        int i;  
        while((i=fl.read())!=-1)  
            System.out.print((char)i);  
        fl.close();  
    }  
}
```

Output:-
