

Name:Rohan Kunkekar

Program name :- MultiThreading

Code :-

```
class Test extends Thread{

    public void run() {

        try {

            Thread.sleep(2000);

        }

        catch(Exception e) {

            e.printStackTrace();

        }

    }

}

public class MultiThreadingDemo {

    public static void main(String[] args) {

        Test test = new Test();

        for(int i=1;i<=100;i++) {

            Thread t = new Thread(test);

            t.start();

            System.out.println(i);

        }

    }

}
```

Output:-
